

# CERTIFICATION PART II WHSC Hazard Modules

Following completion of *Certification Part I* training, joint health and safety committee (JHSC) Certification candidates are required to complete *Certification Part II* training.

This training must be approved by the Chief Prevention Officer (CPO) of Ontario's Ministry of Labour, Immigration, Training and Skills Development (MLITSD) and delivered by an approved provider. Training must also address at least six hazards that are relevant to the JHSC's workplace. The hazards to be addressed by *Certification Part II* training should be discussed and selected by the JHSC.

WHSC and all our training options for *Certification Part II* have been approved. The WHSC offers more than 40 hazard-specific modules for a more customized approach (see below for more details). Each is designed to build on the knowledge gained in *Certification Part I* training and apply it to specific workplace hazards with emphasis on measures to eliminate or control exposures. As a second option to ease compliance, workplaces can enroll in one of several WHSC sector programs. These programs address hazards common to the majority of workplaces in a given sector.

Regardless, *Certification Part II* training must also be a minimum of two days in duration. In most cases, this training must be taken within 12 months of *Certification Part I* training.

## Hazard Awareness Training Modules

- Asbestos
- Biological Hazards
- Chemical Hazards
- Compressed Gas
- Confined Spaces
- Conveyor Systems
- Critical Incident and Post Traumatic Stress
- Electrical Hazards
- Elevating Devices
- Emergencies and Pandemics
- Ergonomic Toolbox\*
- Ergonomics: Basic Principles
- Ergonomics and MSDs
- Ergonomics in Health Care and Social Services
- Fire and Explosion
- Flammables and Combustibles
- Forklift Trucks
- Hand Tools
- Heat and Cold Stress
- Heavy Mobile Equipment
- Hours of Work
- Indoor Air
- Infectious Diseases
- Lockdown: A Crisis Response
- Lockout
- Manual Material Handling
- Mould
- Moving Machine Parts

Physical Hazards  
Propane  
Psychosocial Hazards and Workplace Mental Health  
Roadway Work

Safety Hazards  
Stress in the Workplace  
Transportation of Dangerous Goods  
Vehicle Driving Hazards  
Walking and Working Surfaces  
Water and Ice Rescue  
Welding Hazards  
Work Organization  
Working at Heights Awareness\*  
Workplace Violence and Harassment

**NOTE:** To maintain Certification status, a certified member of a JHSC in Ontario must complete a Refresher program approved by the Ministry's CPO and within three years of completing *Certification Part II* and every three years thereafter. Like all Certification Training, this Refresher program must also be delivered by an approved provider. WHSC *Certification Refresher* training is approved and the WHSC is an approved training provider.

\*Participant materials are available in French for programs marked with an asterisk. Upon request, any of our training programs are available for delivery by a French-speaking, WHSC-qualified instructor.
