

# Certification Part II

## WHSC Hazard Modules

Following completion of *Basic Certification* training, joint health and safety committee (JHSC) Certification candidates are required to complete *Workplace-Specific Hazard Certification* training, also known as *Certification Part II Training*.

This training must be approved by the Ministry of Labour (MOL) and delivered by an approved provider. Training must also address at least six hazards that are relevant to the JHSC's workplace. The hazards to be addressed by *Certification Part II Training* should be discussed and selected by the JHSC.

WHSC and all our training options for *Certification Part II* have been approved by the MOL. The WHSC offers more than 60 hazard-specific modules for a more customized approach (see below for more details). Each is designed to build on the knowledge gained in *Basic Certification* training and apply it to specific workplace hazards with emphasis on measures to eliminate or control exposures. As a second option to ease compliance, workplaces can enroll in one of several WHSC sector programs. These programs address hazards common to the majority of workplaces in a given sector. For a listing of our sector programs please see our product sheet entitled, *Certification Part II – WHSC Sector Programs*.

Regardless, *Certification Part II Training* must also be a minimum of two days in duration. In most cases, this training must be taken within six months of *Basic Certification* training.

### Hazard Awareness Training Modules

- |   |  |
|---|--|
| Adhesives   | Electrical Hazards *   |
| Agricultural Chemicals in the Food Industry       | Elevating Devices  |
| Aluminum  | EMFs and Dirty Electricity   |
| Anaesthetic Gases                                 | Emergency Preparedness and Pandemic Response Plans *                 |
| Asbestos  | Ergonomics in Health Care and Social Services                        |
| Biological Hazards                                | Ergonomics: Recognizing Injuries, Risk Factors and Design Principles |
| Blasting Hazards in Underground Mining Operations | Explosives in Underground Mines                                      |
| Chainsaw Operator                                 | Fire and Explosion   |
| Compressed Gas *                                  | Flammables and Combustibles  |
| Confined Spaces *                                 | Forklift Trucks  |
| Conveyor Systems *                                | Glass Handling   |
| Critical Incident and Post Traumatic Stress       | Hand Tools *   |
| Dust and Fibres                                   | Hazardous Waste  |
| Dyes and Fabric Treatment                         | Heat and Cold Stress   |

# Certification Part II *cont'd*

## WHSC Hazard Modules

Heavy Mobile Equipment	Pesticides
Hours of Work	Power Presses
Indoor Air *	Pressurized Systems
Industrial Lasers	Propane
Infectious Diseases	Roadway Work
Isocyanates	Robotic Machinery
Lighting Hazards	Safety Hazards
Lockdown: A Crisis Response	Solvents
Lockout *	Spray Painting
Man-Made Mineral Fibres	Stress in the Workplace
Manual Material Handling *	Transportation of Dangerous Goods: Legislated Safety Requirements *
Metalworking Fluids	Vehicle Driving Hazards
Molten Materials and Furnace Hazards	Vehicle Emissions
Moving Machine Parts *	Vibration
Mould	Walking and Working Surfaces *
Multiple Chemical Sensitivity	Waste Disposal
Noise *	Water and Ice Rescue
Office Biohazards: Viruses, Moulds and Bacteria	Welding Hazards *
Office Layout and Design	Work Design
Office Work Environment	Work Organization
Oxidizing and Reactive Agents	Working at Heights Awareness *
Patient Handling	Workplace Violence and Harassment **
Personal Protective Equipment *	

\* *Participant materials are available in French for programs marked with an asterisk. Upon request, any of our training programs are available for delivery by a French-speaking, WHSC-qualified instructor.*

\*\* *A similar training program is available in French.*

**Note:** To maintain certification status, a certified member of a joint health and safety committee (JHSC) in Ontario must complete a Ministry of Labour (MOL)-approved Refresher program within three years of completing Certification Part II and every three years thereafter. Like all Certification Training, this Refresher program must be delivered by an MOL-approved provider. The WHSC *Certification Refresher* training is MOL-approved and the WHSC is an approved training provider.
